Summary

AI-focused Product professional with 9+ years of experience leading cross-functional teams in SaaS, AI, and digital asset management. Proven ability to drive operational efficiencies of up to 60% by integrating AI workflows and streamlining team adoption. Passionate about applying product thinking to solve complex UX/UI, content, and data problems with user empathy and measurable impact.

WORK EXPERIENCE

New York Life Insurance - Multimedia And Design

New York, NY

Product Operations Lead

March 2015 - Present

- **Led enterprise rollout of a SaaS DAM platform** across 50+ locations, leading requirements gathering and translating business needs into actionable technical documentation within the Atlassian suite.
- **Increased media asset productivity by 40%** through onboarding programs and custom training for 100+ users.
- **Boosted asset discoverability by 60%** using prompt-engineered metadata via ChatGPT, Claude, and Gemini.
- **Reduced UX friction and system response time by 50%** by analyzing Jira support tickets and refining workflows.
- Acted as the **cross-functional liaison between engineering, creative, and leadership teams**, aligning features with business goals.

Versus Production Company

New York, NY

Production Coordinator

January 2021 - February 2022

- **Achieved a 50% boost in project turnaround speed** by driving adoption of Adobe Sensei AI tools across editing workflows.
- **Maintained a 100% client retention rate** through hands-on technical onboarding and support.
- **Partnered with engineering and creative teams** to solve product inefficiencies through tooling enhancements.
- **Contributed to roadmap discussions** by surfacing insights from production metrics and user feedback.

LEADERSHIP EXPERIENCE

New York Life Insurance - Multimedia And Design

New York, NY

Team Lead, AI Workflow Integration

2021 - Present

- **Managed a team of 8** to deliver AI-based automation features in digital asset management pipelines.
- **Led stakeholder communication and alignment** to integrate AI tools into core workflows.
- **Drove cross-functional communication** to ensure timely delivery of updates and successful platform adoption across teams.
- **Mentored junior staff** on prompt engineering and AI tool usage aligned to roadmap objectives.

PASSION PROJECT/ PORTFOLIO

Pocket PM App

- **Created an AI-powered mobile app** that simulates startup ideation sessions using GPT-based prompt engineering.
- Built structured LLM prompts to deliver **12-step product strategy reports**: including TAM, GTM strategy, feasibility, and PRDs.
- **Developed MVP using no-code tools** (OpenAI API, Cursor, Claude), targeting early-stage founders and aspiring PMs.
- Solves the pain point of unclear product direction by helping users turn vague ideas into **actionable product roadmaps**.
