

Question 1: Article Click-Through Rate

"Do people click on another article after reading one, or do they just come to one article and that's it?" (Lines 261-262)

What Ed wants to know: Are related article recommendations working?

Question 2: Data Page Source Analysis - **COMPLETE**

"Do people come to data pages mainly through Google search? And do they exit immediately after viewing charts?" (Lines 261-268)

What Ed wants to know: Is organic search the only driver for data content? Do users explore further?

[Looker Report Page:](https://lookerstudio.google.com/reporting/d6b93529-847b-458f-aa0b-8e080ee8046b)

<https://lookerstudio.google.com/reporting/d6b93529-847b-458f-aa0b-8e080ee8046b>

Question 3: Referring URL Tracking

"Where were people before they clicked on this page? What is the referring URL?" (Lines 302-309)

What Ed wants to know: What external sources (social, newsletters, search) drive traffic to specific articles?

Question 4: Content Type Performance

"What happens with articles vs homepage vs data pages?" (Line 270)

What Ed wants to know: Which content types retain users? Which cause immediate exits?

Question 5: Cross-Content Navigation

"Are users interested in related articles on data/chart pages?" (Lines 262-268)

What Ed wants to know: Does the "related articles" module on data pages drive engagement?

Question 6: Complete User Journey Path

"What is the full sequence: Source → Landing Page → Page 2 → Page 3 → Exit?"
(Implied throughout)

What Ed wants to know: Can we map common user paths through the site?
